Abstract (en)  
[origin: EP3070730A1] The present invention relates to a fuse holder base that allows easily, comfortably and safely releasing fuses from the outside, without independent parts or springs that would increase manufacturing and assembly costs, said fuse holder base (1) comprising: a socket (10) that has contacts for connecting at least one fuse (2); a fuse holder cover (20) attached to the socket (10) in an articulated manner and having at least one housing (21) for receiving at least one extractable fuse (2); and a fuse retaining device (30), mounted on the fuse holder cover (20), such that said retaining device (30) is movable between two positions, a locking position for locking fuses (2) and a release position for releasing fuses (2).
