Abstract (en)

[origin: WO2015075163A1] The invention relates to a method for drawing a steel wire, said method being applicable to a wire having a carbon level by mass C such that $0.05\% < C < 0.4\%$, and an entirely ferritic, pearlitic or ferritic-pearlitic microstructure. The method comprises an uninterrupted series of steps (7001 - 700m) of drawing the wire of a diameter d' to a diameter d, d' and d being expressed in mm, wherein the rational deformation $\epsilon'=2 \cdot \ln(d'/d)$ is such that $\epsilon' > 4$.
