Abstract (en)

[origin: WO2015048838A1] There is provided a mixture for a road formations, open-cut mine roads, underground mine roads, railway formations, airport pavements, reservoir linings, dams and the like. The mixture comprises a ratio of fines (215) to aggregates (210) exhibiting properties including reduced permeability, inferior material tolerance, reduced moisture content and the like. There is also provided a method of blending and compaction thereof.
