Abstract (en)  
[origin: WO2015075126A1] The invention relates to a domestic appliance (1), having at least one electrically actuated device-type-specific device component (4a-4f) which is designed to execute an operating function which is characteristic of the type of domestic appliance (1), having a control apparatus (5a-5f) which is designed to actuate the device-type-specific device component (4a-4f), and having an input apparatus (2) which is electrically connected to the control apparatus (5a-5f) and which has a display means (6, 6a), at least one programmable input means (7a-7e) and also at least one switch (9a, 9b) with which electrical contact is made in order to switch a main function of the domestic appliance (1), which main function is characteristic of at least two different types of domestic appliances, and the input apparatus (2) further has a programmable control device (10) in which at least two programmes, which are differently designed to actuate a corresponding number of different types of domestic appliances (1), are stored, said programmes each being designed for device-type-specific communication between the at least one programmable input means (2) and the control apparatus (5a-5f), and which is designed to activate only that programme which corresponds to the type of domestic appliance (1) which is connected to the input apparatus (2) on the basis of the type of that domestic appliance (1) to the control apparatus (5a-5f) of which the input apparatus (2) is connected.
