Abstract (en)

[origin: WO2015075361A1] The invention relates to an electrical switchgear mounting (100) comprising a frame (110) surrounding an opening (113) for receiving a switchgear mechanism, and, for attaching same to a wall box, at least one dogging accessory (200) which extends perpendicular to said frame, said dogging accessory comprising at least one dogging base (210) and an attachment dog (220) mounted on said dogging base, pivotably movable between a retracted position and an extended position relative to said dogging base. According to the invention, the mounting comprises rack mounting means (350) which engage with complementary mounting means provided on the dogging base, such that the dogging base is capable of being mounted on the switchgear mounting with at least two different heights relative to the frame of said mounting. The invention also relates to an associated dogging accessory, dogging assembly and electrical switchgear.
