Abstract (en)
There is provided an apparatus comprising: a container 100 for holding a fire suppressant; a valve sealing said container 100 and comprising a diaphragm 130 configured to perforate so as to release fire suppressant from said container 100, wherein said fire suppressant exerts a force on said diaphragm 130 in use; a pyrotechnic charge 140 for perforating said diaphragm 130; a device 150 configured to reduce the force exerted by said fire suppressant on said diaphragm 130 in use.
