Abstract (en)

Active safety clothing equipment or a means of line irradiation comprising a light source connectable to a source of electrical energy. The equipment or the means further comprises a side-emitting light guide (1) which is connected to a light source (3) with a portable source of electrical energy and enclosed in a textile sheath (2) which is provided on at least part of the length of the light guide (1) with at least one fastening means for attachment to a carrier element or garment.
