Abstract (en)
[origin: WO2015078852A1] The invention relates to a method for producing a rigid container (10), in particular a small vial, particularly a small vial for a cosmetic product, said container including a bi-layer structure comprising a first layer, referred to as the body of the container (20), defining a neck (22) of said container (10) and a second layer, referred to as the casing of the container (30), enclosing said body (20). The method according to the invention includes a step of shaping a preform inside a part forming said casing (30), so as to form said body (20). The invention also relates to a rigid container (10) produced using said method and a device for carrying out said method.
