Abstract (en)

[origin: WO2015079184A1] The invention relates to a plastic rear window (1) for a motor vehicle, which has a third stop light on the inner surface thereof, and is characterized in that it includes an area (3) in which the plastic material is more transparent than in the rest (4) of the rear window (1). The light source (5) of the third break light is positioned on the inner surface (1a) of the rear window such as to scatter the light emitted by said source through said area (3).
