Abstract (en)
[origin: WO2015078519A1] The present invention relates to a capacitor holder (1) which is suitable for immobilizing a capacitor (2) which comprises a cylindrical main body (3) which has an upper base (4) and a lower base (5), an electrical terminal (6) which is provided on the upper base (4) and a threaded rod (7) which is provided on the lower base (5). The capacitor holder (1) according to the present invention comprises a supporting portion which is configured to form-fittingly support the cylindrical main body (3) and a holder portion which is configured to resiliently snap into one or more than one recess (8) formed by the adjacent threads (9) of the threaded rod (7) as the capacitor (2) is pushed into the supporting portion.
