Abstract (en)
The invention pertains to a process for coating of a substrate comprising the steps of: (a) Applying a first coating composition to a substrate, the first coating comprising a solvent and a first resin selected from the group consisting of polyol resin, alkyd resin and/or polyacrylate resin, the resin comprises a reactive group; (b) Applying a second coating composition onto the first coating composition, the second coating composition comprising an epoxy resin, a second resin having OH and/or carboxylic acid functional groups, and a curing catalyst; and (c) Curing the coating compositions to obtain a coated substrate.
