Abstract (en)

A centrifugal fan(10,110,210) includes an impeller(30), a motor(40) rotating the impeller(30) about a center axis(J), and a housing(20,120,220) accommodating the impeller(30). The housing(20,120,220) includes an intake port(61) arranged above the impeller(30), an exhaust port(62,162) arranged radially outward of the impeller(30), an annular upper flow path(51), and a lower flow path(52,252) arranged below the upper flow path(51) and connected to the upper flow path(51). The annular upper flow path(51) can be partially arranged between a housing(20,120,220) inner circumferential surface and the impeller(30) in a radial direction. The upper flow path(51) and the lower flow path(52,252) are arranged to define a flow path having a scroll shape.
