Abstract (en)
The present invention provides an LED lighting fixture comprising: (i) a light part which is provided with a plurality of LEDs as light source to generate light; (ii) a housing including which is provided with an opening part on one side thereof and a light-emitting part for emitting light to the outside on the other side thereof, and which has an inner space; (iii) a reflecting part provided on an inner side of the housing (ii) so as to reflect the light generated from the light part (i) to the light emitting part; and (iv) a heat-emitting part which is provided on the rear side of the light part (i) so as to be exposed to the outside, and which emits heat to the outside, wherein a front side of the lighting part (i) is provided toward the inner space of the housing so as to cover the opening part, and the light-emitting part is provided so as to emit the light generated from the light part (i) or to emit the light reflected through the reflecting part (iii) from the lighting unit (i).
