Abstract (en)
[origin: EP3076095A1] In a known indoor unit, a casing may move away from a wall surface and a gap may be formed between the casing and the wall surface, with the result that the design of the indoor unit may be deteriorated. An indoor unit includes a mounting board 2 fixed to a wall surface and a bottom frame 10 (casing) attached to the mounting board 2. The bottom frame 10 (casing) has screw holes 73 to 76 (screw fixing portions) for fixing the bottom frame 10 (casing) to the wall surface of the room.
