Abstract (en)
[origin: WO2015082841A1] The invention relates to a composite tarp for growing plants above the ground, characterised mainly in that said tarp includes: a first flexible wall (1) in the form of a rectangular strip provided with a longitudinal central area (10) provided with through holes, provided for being arranged to form a trough; and a second rectangular flexible wall (2) which is watertight and extends beneath the perforated region of the central longitudinal area (10) of the first wall (1) forming a drainage gutter for liquid effluent, the central area (10) of the first wall (1) being provided for receiving a growth medium.
