Abstract (en)

[origin: WO2015081350A1] The invention relates to a drive device (1) for a movable furniture part (2), comprising a retracting device (3) for retracting the movable furniture part (2) out of an open position (OS) into a closed position (SS), said retracting device (3) having a housing (4); a guide path (5) which is formed in the housing (4) and which comprises a retaining section (6); a retracting slide (7) which can be moved in the guide path (5) relative to the housing (4) and can be locked in the retaining section (6); and a retracting force accumulator (8) which urges the retracting slide (7). The retracting slide (7) can be moved along the guide path (5) between a first end position (E1), which corresponds to the retaining section (6), and a second end position (E2), which corresponds to the closed position (SS), wherein the distance (A) between the end positions (E1, E2) along the guide path (5) can be changed.
