Abstract (en)

[origin: WO2015082491A1] The invention relates to a plastic pipe (1) in the form of a high-pressure pipe, having a pipe wall (2) with a first layer (3) made of a plastic and a reinforcing structure (4) arranged in the pipe wall (2). In order to provide a plastic pipe (1), the structure and mechanical properties of which are optimized, it is proposed that the reinforcing structure (4) has a tubular design and is embedded in the first layer (3). The invention also relates to a method for producing a plastic pipe (1).
