Abstract (en)

[origin: US2015152336A1] A process for converting triacylglycerides-containing oils into crude oil precursors and/or distillate hydrocarbon fuels is disclosed. The process may include: reacting a triacylglycerides-containing oil-water-hydrogen mixture in a single reactor at a temperature in the range from about 250° C. to about 650° C. and a pressure greater than about 75 bar to convert at least a portion of the triacylglycerides via homogeneously catalyzed hydrothermolysis and heterogeneously catalyzed hydrotreatment.
