Abstract (en)  
[origin: WO2015085227A1] The present Invention discloses an inflatable pool, comprising a top wall or panel (10), bottom wall or panel (20), inner surrounding or side wall or panel (106) and outer surrounding or side wall or panel (108). The outer side wall is concentric with and surrounds the inner side wall to define circular trough structure. The top wall or panel is connected to the top of the inner side wall and the outer side wall, the bottom wall or panel is connected to the bottom of the inner side wall and the outer side wall, and an air chamber is generated by the top wall or panel, the bottom wall or panel, the inner side wall and the outer side wall. The pool also comprises a plurality of laminated interval or bracing panels (120).
