Abstract (en)

[origin: WO2015082462A1] An electric machine (1), in particular a pump, comprises a first housing part (10) and a second housing part (11). At least one clamp (20), in particular two, three or four clamps (20) are distributed along the periphery of the electric machine (1). The first and second housing parts (10, 11) each have a substantially peripheral holding section (14, 15) by means of which at least one clamp (20) secures the first and second housing parts (10, 11) to one another.
