Abstract (en)
[origin: WO2015083038A1] The invention relates to a gas cooking appliance (10), particularly a gas stove device, which comprises at least one spindle shaft (12) mounted so as to rotate and/or be axially displaceable between at least two end positions, and at least one magnet (14) provided to actuate at least one magnetically-actuatable switching element (16). When in an assembled state, said at least one magnet (14) is secured to the at least one spindle shaft (12) at least in the axial direction (18) of said at least one spindle shaft (12), and is provided to actuate said at least one switching element (16) when in at least one of the at least two end positions of said at least one spindle shaft (12).
