Abstract (en)

[origin: WO2015082271A1] The invention relates to a domestic refrigeration appliance (1) comprising an interior (4, 5) which is delimited by walls (3a, 3b, 3c) of an interior compartment (3) and comprising at least one container (9, 10) for holding foodstuffs, said container being displaceably arranged in the interior (4, 5). A support (11) is displaceably mounted in the interior compartment (3) and the container (9, 10) is arranged on the support (11) such that it can be non-destructively detached and is motion-coupled to said support in order to be displaced together with the support (11).
