Abstract (en)  
[origin: WO2015088401A1] The present invention relates to a dispenser for a stack of napkins, the dispenser (1) comprising a container (2) having a bottom wall (5) extending in a horizontal plane, and side walls (6) extending from said bottom wall (5) in a vertical direction perpendicular thereto and defining a dispensing opening (7) opposite to said bottom wall (5), said side walls surrounding a rectangular supporting surface (8) for supporting a stack (3) of interfolded napkins (11), said dispenser (1) further comprising a cover(4) defining a dispensing mouth (9) and having at least an upper position, such that a space for containing a stack of interfolded napkins is defined between said supporting surface (8) and said cover (4) when said cover (4) is in said upper position. The container (2) is divided along a horizontal plane being parallel with said horizontal plane of said bottom wall (5) so as to define a bottom portion comprising said bottom wall (5), and a wall portion comprising at least a part of said side walls (6), said bottom portion being releasably attached to said wall portion by means of a magnetic lock (27), for enabling refill of napkins from said bottom side of said dispenser (1).
