Abstract (en)
[origin: WO2015086298A1] Packaging (1) for smoking articles. The packaging comprises an outer packet (2) comprising a front wall (21) and a back wall (22) connected by at least a top wall (23), a bottom wall (24) and a side wall (25) to form a sleeve with at least one side-opening (26) opposite the side wall (25). An inner packet part (3) comprises a front wall (31) and a back wall (32) connected to each other by at least a bottom wall (33) and two opposite substantially parallel side walls (34, 35) to define an enclosure for housing a bundle of smoking articles (B), said enclosure having at least one top opening between said front, back and side walls, the inner packet part (3) being housed within the outer packet part (2) and being movable relative to the outer packet part through the at least one side-opening between a closed position, in which the inner packet part (3) is fully inserted in the outer packet part (2), and an open position, in which the inner packet part (3) is at least partly extracted from the outer packet part (2). The inner packet part (3) further comprises reinforcement means (4) configured to increase resistance of at least one of its front and back walls (31, 32) to compression forces (Fc) having at least one component exerted perpendicularly towards said front and/or back walls (31, 32).
