Abstract (en)
[origin: US2015158628A1] A package for holding a food product is disclosed herein. The package includes a flexible material having a first portion forming a first side of the package, a second portion forming a second side of the package, a first closed end, and a second closed end. The first portion and the second portion are in face-to-face contact at each of the first closed end and the second closed end and are spaced apart to form an interior space. A removable portion is removably attached to a base portion by an opening feature. The opening feature comprises at least one line of weakening in at least one of the first portion and the second portion. The at least one line of weakening extends across the first closed end and the second closed end and the at least one of the first portion and the second portion defining the interior space.
