Abstract (en)
[origin: WO2015089235A1] A beverage container that includes a main body portion having an open top and a closed bottom, an interior, a circular rim and a first set of threads on an inside surface thereof that are positioned adjacent the rim at a first height. The rim includes a downwardly depending portion that extends below the first set of threads. The container also includes a removable cover with a bottom, a generally cylindrical side wall, an annular flange extending outwardly from the generally cylindrical side wall and an annular collar. The collar, the annular flange and the side wall define a first channel that receives the rim, and the bottom and the generally cylindrical side wall cooperate to define a cover cavity. The side wall includes a second set of threads on an outside surface thereof that are matingly engaged with the first set of threads.
