Abstract (en)
[origin: WO2015088461A1] The present invention relates to a hood opening system (1) that is designed to enable opening the hood used in vehicles more safely and easily, and comprises at least one time counter (10) which, after the second release member (8) is activated, counts a certain period of time, and if the hood is not lifted within this period of time, sends a command to the controller (3) to relock the second release member (8).
