Abstract (en)  
[origin: WO2015086632A1] The invention relates to a refrigeration appliance (10, 40, 50, 60), having a body (11), which has a cooling chamber (16), which can be closed at a door opening (13) by means of a door (12) attached to the body (11), having a light, having storage shelves (17) in the cooling chamber (16), which are spaced apart from the door opening (13) by a spacing, there being a clear space (33) between door opening (13) and storage shelves (17), and having a drawer (18) which is arranged underneath the storage shelves (17), which projects into the clear space (33) when pushed in and which has side walls (59) and a front edge (49). In that refrigeration appliance (10, 40, 50, 60) the light is a spotlight (31, 41, 51, 61) for emitting light within a cone of light (42, 52, 62), wherein the center of the front edge (49) of the drawer (18) is located within the cone of light (42, 52, 62), and the side walls (59) of the drawer (18) are located outside the cone of light (42, 52, 62).
