Abstract (en)
[origin: WO2015086299A1] The invention relates to a connector for an electrical connection, comprising at least two electric lines (2), the ends of which are connected to contact elements, and a housing (1), which surrounds the electric lines (2) and the contact elements at least in the region of their joining point. The housing (1) comprises a holding element (4) permanently connected thereto, said holding element (4) having receptacles (12) for the electric lines (2) which maintain the lines (2) in the same position.
