Abstract (en)
[origin: WO2015087208A1] The aim of the invention is to provide a generic device having improved properties in terms of advantageous heating. Said aim is achieved by a stovetop device (10), in particular an induction stovetop device, comprising a heating zone (12) for heating cookware (14) placed thereon and/or food to be cooked thereon, and a control unit (16) for operating at least one subarea (18a-f) of the heating zone (12) as at least one target-temperature burner in at least one mode of operation and assigning different target temperatures to different positions of the at least one target temperature burner.
