Abstract (en)

[origin: EP3081108A1] The present invention relates to an insert (1) for the customization of a footwear (100), more particularly of a sports footwear. The present invention further relates to a footwear that is customizable by using the aforementioned insert as well as to a method for the customization of a footwear, said method using the aforementioned insert. The insert (1) according to the invention comprises a layer made of thermo-formable material (3) and a layer made of cork (5) coupled to each other. The presence of the layer made of thermoformable material (3) allows customization of the footwear according to the morphology of the foot of the individual user; the presence of the layer made of cork (5) allows good thermal insulation and effective transmission of the movements from the user's foot to the footwear.
