Abstract (en)

[origin: CN106044324A] The invention relates to a winding machine which combines a plurality of fiber tapes with one another and stretching into cotton wool, wherein the formed cotton wool is wound into a cotton wool roll on the winding sleeve by means of two winding rollers or by means of at least one winding roller and a strip to be fed onto a combing machine. The invention is characterized in that the at least one winding roller has an elastic outer shell or an outer circumference.
