Abstract (en)  
[origin: EP3081705A1] The invention relates to a urinal anti-splash mat which has sealed filaments and different conic levels consisting of small filaments that stop urine before it splashes thus avoiding the spread of diseases and liquid accumulation. This mat is manufactured to prevent bad odors caused by urine accumulation when it splashes against urinal walls and/or against waste liquids inside them and falls outside the urinal and traps the falling liquid. In addition, it offers a more hygienic environment and prevents the spread of diseases.
