Abstract (en)

A wall protector 10 is provided to prevent building materials from being splashed back onto a wall 4 from an adjacent surface 2 on which a person can stand. The wall protector 10 is provided as a barrier having a first portion 11 arranged to engage with the adjacent surface and a second portion 12 to contact the wall thereby providing an upwardly extending barrier to shield the wall against building material that lands on the adjacent surface from splashing back onto the wall or from falling through a gap between the adjacent surface and the wall.
