Abstract (en)  
[origin: WO2015091484A1] Disclosed are a receptacle unit and a rim unit. The receptacle unit comprises a tub element, while the rim unit comprises a locking section and a lifting section, the locking section being designed to be secured to the tub section. The lifting section includes an undercut which extends transversely to a first direction and which is designed to transmit a lifting force acting in the first direction to the rim unit.
