Abstract (en)

[origin: WO2015091646A1] The invention relates to a lifting device (13) for a holder (11) for items to be washed, which holder for items to be washed is comprised by a water-bearing domestic appliance (1), wherein the holder (11) for items to be washed can be moved selectively into a washing container (2) of the water-bearing domestic appliance (1) or out of said washing container, wherein the lifting device (13) is designed to lift the holder (11) for items to be washed when the holder for items to be washed is moved out of the washing container (2) and to lower the holder for items to be washed when the holder for items to be washed is moved into the washing container (2), wherein the lifting device (13) has a driving apparatus (14) and a control apparatus (15), wherein the control apparatus (15) is designed, in the event of manual movement of the holder (11) for items to be washed, to control the driving apparatus (14) in such a way that the driving apparatus (14) supports the manual movement of the holder (11) for items to be washed by means of a supporting force.
