Abstract (en)

[origin: WO2015090503A1] On a track-laying machine (1) for performing track works, a number of fastening devices (9) is arranged at a distance from one another in the longitudinal direction (2) of the machine in an upper end region (8) in relation to a vertical direction. A lower end of each fastening device (9) in relation to the vertical direction is mounted on the track-laying machine (1), while an upper end of each fastening device (9) that is located at a distance from the lower end is connected to a safety cable (12) extending in the longitudinal direction (2) of the machine.
