Abstract (en)
[origin: WO2015091936A1] The invention relates to a portable refillable sprayer (1) including: a hollow first body (8) having a top portion (9) and bottom portion (10) that has an installation opening (13); a spraying head (14); an actuation means (18) located in the top portion (9) of the hollow first body (8) and having a first inoperative position and a second operative position, said actuation means being arranged to be actuated by a user; a guiding spring tube that is arranged to be compressed when the spraying head (14) and the actuating means (18) are, respectively, in the second spraying position and the second operative position, said guiding spring tube (19) also being arranged to contain a refill (4) of the contents to be sprayed; and a second body (3) including a receiving area (24). Said first body (8) and said second body (3) form a casing protecting said guiding spring tube (19).
