Abstract (en)

[origin: WO2015091803A1] The invention relates to a detergent cartridge (14) for cleaning a soiled interior (28) of an appliance (10), comprising: - a one-piece housing (42) for accommodating a treatment agent, - at least one mounting (50) for connecting the detergent cartridge (14) to a water supply (20), wherein water can be introduced via the mounting (50) into the housing (42) at a pressure which enables a spraying of a treatment agent mixture (61), and - at least one spray opening (54) for spraying a treatment agent mixture (61), wherein the at least one spray opening (54) is arranged as a rotational opening on the periphery (44) of the housing (42) such that the detergent cartridge (14) is set in rotation during the spraying of a treatment agent mixture (61). The invention also relates to an appliance (10) having such a detergent cartridge (14) and to the use of a detergent cartridge (14) for cleaning appliances (10).
