Abstract (en)

[origin: WO2015092017A1] Method for printing a three dimensional structure (1), wherein a first printing material being in a first state (11) is deposited onto a substrate (2) in a first step, wherein the first printing material is in a reversible manner at least partially transformable from being in the first state to being in a second state by a transformation means, wherein the deposited first printing material is transformed from being in the first state to being in the second state by the transformation means in a second step
