Abstract (en)
[origin: WO2015093952A1] The invention relates to a method for coupling a manoeuvrable vessel (1) to a floating structure (2), the method comprising; - providing a pickup system (3) coupled to the floating structure, the pickup system comprising a float (4), - providing a vessel coupling system (5) comprising manoeuvrable coupling means (6) on the manoeuvrable vessel, - aiming the manoeuvrable coupling means towards the pickup system, - guiding the manoeuvrable coupling means into float coupling means (7) of the pickup system, such that the manoeuvrable coupling means is accommodated in to the float coupling means, - locking the manoeuvrable coupling means into the float coupling means, such that a coupling connection between the manoeuvrable vessel and the floating structure is established, - connecting the floating structure to the coupling vessel.
