Abstract (en)

[origin: WO2015091536A1] The invention relates to a protective cap for a dispenser (2) for discharging pharmaceutical and/or cosmetic liquids (4), wherein the dispenser (2) has a liquid reservoir (21) and an outlet opening (24) through which the liquid (4) can be dispensed into a surrounding atmosphere, and wherein the protective cap (3) has at least one ventilation opening (30) to allow communication between an interior and an external surroundings, and an irreversibly removable sealing element (5, 6, 7) which covers the at least one ventilation opening is arranged on the protective cap, by means of which sealing element the at least one ventilation opening is closed in an airtight and germproof manner before a first use. The invention further relates to a discharge device (1) comprising a dispenser (2) and a protective cap (3).
