Abstract (en)

[origin: WO2015095748A1] An oil spray lubricator system for knitting machines, operable with a source of compressed air and a source of lubricating oil under pressure, comprising: a. an air flow filter that receives compressed air from said source thereof and reduces water in the air flow, b. a valve that controls said air flow, c. a first regulator that sets selected pressure of said air flow, and d. a second regulator that receives oil flow from said source thereof and sets selected pressure of said oil flow, g. a pulse timer that ejects said oil flow in selected frequency of pulses, h. a multi-port oil generator having an oil chamber having oil and air inlets and multiple oil ducts each of which has an inlet and an outlet and is situated within a larger bore diameter air duct that surrounds and creates an annular passageway between said oil and air ducts, and i. at least one ejection nozzle.
