Abstract (en)
[origin: WO2015091389A1] The invention relates to a tub arrangement for a laundry treating machine, comprising a plastic tub 1 and a counterweight 3 which is secured to the tub. The tub 1 has at least one securing protrusion 4 which is anchored in a corresponding anchoring bore 7 in the counterweight 3 by means of a formfitting connection 12. The invention further relates to a laundry treating machine with such a tub arrangement. The aim of the invention is to provide a tub arrangement which is characterized by a further simplified production and a particularly simple assembly. For this purpose, the securing protrusion 4 is made of a heat-deformable material, and the formfitting connection 12 is produced by means of the heat deformation of the securing protrusion 4.
