Abstract (en)

[origin: WO2015095517A1] A system and method for enhanced token-based payments. The system and method including software and hardware to receive, via a network, a request for authorization; create, in response to the request, a dynamic payment packet (DPP) for payment: transmit, via a network, the DPP; receive, via a network, an authorization request, the DPP, and a transaction ID; receive at least one additional data element relating to the customer involved in the transaction and the transaction itself; and transmit, via a network, the transaction ID, an authorization response, and token.
