Abstract (en)

[origin: WO2015090560A1] The description relates to a method for handling value documents using a memory device for data that has a memory area of prescribed memory area size, in which value documents are transported individually to a sensor device, the sensor device is used to capture measurement data for a respective value document, a storage priority is ascertained for the respective value document as a prescribed function of at least one portion of the measurement data that is required for ascertaining the storage priority, the ascertained storage priority is taken as a basis for storing handling data for the respective value document in a memory block in the memory area, and wherein the storage priority influences the duration of the storage of the respective handling data.
