Abstract (en)

[origin: WO2015090729A1] The invention relates to a metal protective conductor connection element for arranging on an electric series terminal (50) which has a terminal housing (52), comprising a metal foot arrangement (30) which has at least one first metal foot (10) and at least one second metal foot (20) for supporting on a support rail (60). The first metal foot (10) has a first spring element (11a) with a contact region (12) for forming a force-fitting connection of the first spring element (11a) of the first metal foot (10) to the support rail (60) and a second spring element (11b) with a securing region (13) for forming a form-fitting connection of the second spring element (11b) of the first metal foot (10) to the support rail (60), and the second metal foot (20) has a first spring element (21a) with a securing region (22) for forming a form-fitting connection of the first spring element (21a) of the second metal foot (20) to the support rail (60) and a second spring element (21b) for forming a form-fitting connection of the second spring element (21b) of the second metal foot (20) to the support rail (60).
