Abstract (en)  
[origin: WO2015089540A1] The invention relates to a device 1 for contacting electrical conductors and/or electrical plug connectors, said device comprising at least one front housing part 2 and a rear housing part 3, wherein the front housing part 2 and the rear housing part 3 are formed as one unit, wherein at least one first electrical contact connection is provided in the front housing part via contacting points 7, and at least one additional electrical contact connection is provided in the rear housing part 3 via contacting points 9, wherein a step 6 is formed between the front housing part 2 and the rear housing part 3 on one side of the device 1, and wherein contacting points 8 are provided in the region of the step 6 for the purposes of electrical contacting. The invention also relates to a lamp or an electrical device having a device of this type.
