Abstract (en)  
A child support device, such as a high chair, having a tray base, an entertainment component (130, 230, 330, 430, 530, 630) thereon, and an optional tray liner (140, 240, 340, 440, 540, 640). The device allows a child to be entertained, stimulated, and/or distracted during feeding times. The device further allows a child to clean food from his hands while engaging the entertaining component (130, 230, 330, 430, 530, 630). For example, the entertainment component (130, 230, 330, 430, 530, 630) can function as a squeegee. The entertainment component can also prevent a child from dragging food into his lap from the tray.
