Abstract (en)

There is disclosed a unit (1) for manufacturing articles (2) filled with a pourable product, comprising: a filling station (11), which is adapted to fill articles (2) with pourable product; a labelling station (14), which is adapted to apply a plurality of labels onto articles (2) and is arranged downstream of filling station (11), proceeding according to the advancing direction of article (2); a drying assembly (13), which is adapted to dry articles (2) and is interposed between said filling station (11) and labelling station (14); and a transfer station (16), which is interposed between filling station (11) and labelling station (14) and is adapted to transfer articles (2) along a curved path (T) from filling station (11) to labelling station (14); unit (1) comprises an inspection device (17) and a discharge device (18), which are interposed between filling station (11) and labelling station (14); inspection device (17) is adapted to inspect articles (2) as the latter travel along path (T); discharge device (18) is adapted to discharge articles (2) which are not suitable to be labelled.
